Post-graduate School
in Gestalt Psychotherapy

gtk the pub-
lishing

GTK, Journal of Psychotherapy and GTK-Books

Since 2010 the Gestalt Therapy
hcc Kairos Institute publishes
online the international Journal
of Psychotherapy Gestalt
Therapy Kairos

GTK, with the aim of opening on the web a
new access way to the Gestalt universe and
to contribute, in a national and
international outlook, to the debate on pain
and discomfort. A Journal designed as an
open space, where sharing and research,
dialogue and comparison are sign of
attention to our time and of hope in a
possible change. A bilingual Journal (Italian
and English) to walk in the world with
liberty and open minded.

Search texts in the field of theory and clinic,
with articles or interventions that are
necessary to make the point or to open
perspectives in a gestaltic key, have been
put first in each journal.

Particular attention is given to the
comparison with social contexts (section
Society and psychotherapy) and the reports
of national and international conferences
in the area of psychotherapy.

A wide range is reserved for the arts and
poetry that guides the reader through the
exploration of pain and the forecast of a
possible human cure. Inside the great
frame of our Journal, special numbers are
included, the GTK books, actual books
devoted to the subject of great importance,
in respect of which our research has
already had substantial and definitive
results.

If the Journal shows the results of the
research in progress, the GTK books are
dedicated to the fundamental points of our
clinical and hermeneutic work.

Publications

Journal of Psychotherapy

English

GTK1 Index
